

[H.R. 3962, the Affordable Health Care For America Act](#) eliminates hundreds of billions of dollars of waste and fraud in medicare as well as incorporating increased payment accuracy and eliminating overpayments. It uses those savings to;

- Increase payments to primary care physicians
- Eliminate the donut hole
- Extend key protections for rural providers
- Improve access to mental health services
- Eliminate co pays and deductibles for preventative services including mammograms and cancer screenings
- Extend Medicare's solvency by 5 years or more
- Fix rural payment disparities that hurt Oregonians by revising the payment rates in Medicare for "low cost, high quality " states like Oregon.
